

# DO YOUR DOORS OR WINDOWS LEAK AIR?

## Seal them with BinjaSystem weather-strip!

### Simple ideas are the Best and Vice Versa

BinjaSystem is designed to provide perfect insulation of doors and windows, sealing out cold or hot air, noise and dust. Exposed to weather, windows and even doors may get warped over time. We must all have seen a door twisted due to its position between the elements and the air inside. Well, doors may get twisted, but why worry? BinjaSystem seals even larger gaps, for which the conventional weather-strip just would not be enough.

BinjaSystem is a patented weatherstrip system.

BinjaSystem mouldings are available in different lengths, in white or in four wood finishes. Thresholds are available in real oak or in MDF with oak finish.
